

# genuconnect

VPN Software Client for secure remote access to government and company networks

## Mobile Work

Providing high security access for users connecting to restricted networks

### Secure Access to Confidential Data

When working remotely, a highly secure connection to the company's network is imperative. The VPN Software Client genuconnect does exactly that for laptops and tablets running Microsoft Windows 10 or 11. Its main functions:

- It automatically establishes a highly secure VPN connection for all users
- Interoperability with solutions for hard disk encryption, device control, and endpoint protection is ensured

genuconnect protects the connections of mobile devices of employees at official public bodies or companies active in the classified data sector and scales with growing infrastructures.

» Maximum security with minimal user effort - that is the principle upon which genuconnect makes use of all relevant Windows mechanisms.

## Effective Security Assistant

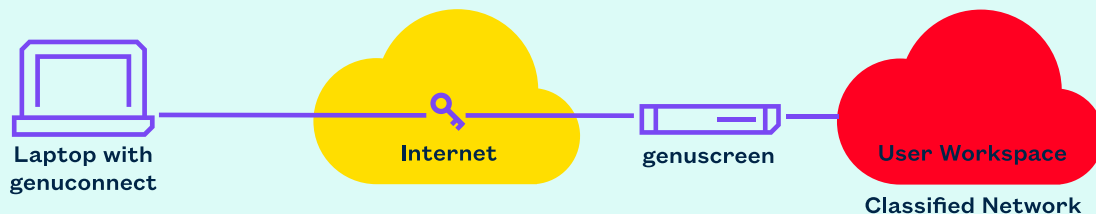

The VPN Software Client is designed for maximum usability. In addition, it is compatible with the Microsoft ecosystem: The client can be managed with the existing Windows tools, so that installation, configuration, update, and uninstalling are quick and easy.

Yet the solution is also based on a unique IT security architecture: Maximum protection is ensured through the use of proven IPsec technology and BSI-compliant crypto algorithms in combination with a smart card.

## Powerful, Flexible, and Scalable

On laptops and tablets with Microsoft Windows 10 or 11, the VPN Software Client allows highly secure communication in protected networks. genuconnect is compatible with the VPN station genuscreen, no backend modifications are needed.

The solution supports common smart cards. genuconnect can be used in infrastructures with more than 100,000 VPN clients.

Highly secure connection of Windows devices with the VPN Software Client genuconnect

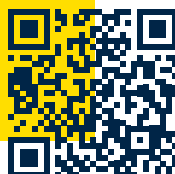

## Reasons Why

- Experts for the IT security of companies and public organizations
- Offer of a comprehensive, modular IT security portfolio
- Quality without compromise for all products, services, and processes

## genua – Excellence in Digital Security

genua develops innovative, reliable as well as market-shaping products and solutions. Whether in the public sector, for the operators of critical infrastructures, in industry or in the protection of classified information: we provide answers to the IT security challenges of today and of tomorrow.
