

SOLUTIONS

01. CLOUD SOLUTION

Use the certified data erasure software on your local target computer and manage erasure licences, erasure reports and hardware audit data in the cloud.

02. OFFLINE/PXE SOLUTION

Use the certified data erasure software offline on your local target computer: You can manage erasure licences, erasure reports and hardware audit data.

03. DATA ERASURE MACHINES

A universal hardware solution to erase several HDDs in 19" racks using a hot-plug hard drive unit. Independent, ready to use data erasure machinery.

Is your IT prepared for the GDPR?

With the new General Data Protection Regulations (GDPR) coming into force from May 2018, you have a legal obligation to make sure that any unwanted or unused personal data you have on any storage media is securely erased and that you have evidence to support this.

Certus Software has the entire infrastructure needed to deal with this matter and ensure compliance with the GDPR.

ADVANTAGES

EU provider

The best data erasure supplier in Europe.

Common Criteria EAL3+

Certified data erasure in accordance with Common Criteria guidelines.

Reporting

Individual, adaptable audit and hardware reporting and more.

Offline

Erasure possible without internet access. Or using a data erasure machine.

24/7 Support

You can access our support hotline by telephone, email or using the ticket centre.

Various pricing models

- ✓ Free trial access
- ✓ Price per Erasure
- ✓ Contract pricing that includes long term price guarantee & monthly payments
- ✓ Enterprise Solutions: a custom made pricing model

Admin Tool

- ✓ Centralised management of licences and clients
- ✓ Transparent job creation, allocation and order processing
- ✓ Automatic software updates
- ✓ Real-time data and business intelligence
- ✓ Implementation into your existing system landscape
- ✓ Individually adjustable erasure, audit and hardware reporting

Technical specifications

- ✓ Up to 200 HDDs erased simultaneously
- ✓ Both BIOS & UEFI type host
- ✓ Block devices supported by the erasure engine: SSD, IDE, SATA, SCSI, SAS, Fiber Channel, USB and RAID volumes
- ✓ Additional customized level of erasure verification supported from 1% to 100%
- ✓ Supported erasure patterns (13):
 - * Standard Overwrite
 - * British HMG 155 Baseline
 - * Russian GOST R 50739-95
 - * NSA 130-2
 - * British HMG ISS Enhanced
 - * US DoD 5220.22-M
 - * NCSC-TG-025
 - * Navso P-5329-26
 - * US Air Force 5020
 - * Bruce Schneier
 - * Canadian OPS- 11
 - * German VSITR
 - * Gutmann Algorithm

Secure Audit & Reporting

- ✓ Generated and securely transmitted erasure reports: PDF, XML, HTML, XLS
- ✓ Certified mechanism for data integrity checking during transmission
- ✓ Certified erasure events auditing mechanism
Embedded erasure verification tool (hexviewer) to visually check the erasure results directly on the block device
- ✓ Dual option for erasure report delivery: on directly attached storage device (USB drive) or to remote management server

Information Security Certification

- ✓ Common Criteria (ISO/IEC 15408) EAL3+
- ✓ The product was evaluated according to an Evaluated Assurance Level which corresponds to a package of security assurance requirements (SAR) covering the complete development, delivery and support phases, with a precise level of strictness (depth & rigor). Moreover, it is increased with ALC_FLR (Flow Remediation)

ADD CERTUS SOFTWARE TO YOUR PORTFOLIO

We are breaking with conventional methods and treading new paths, as we develop solutions from practice for practice.

As a Certus business partner, you can expand your portfolio and increase your sales. Benefit from our reseller prices, distributor-specific support and the opportunity to collaborate on the development of the software. We will also provide support in the form of a marketing kit.
