

YouWipe - Certified Data Erasure

YouWipe is a software-based method, ensuring that 100% all data on HDD, SSD, Flash and Mobile devices is completely destroyed and rendered unrecoverable by any current technology.

YouWipe has been certified under rigorous and professional standards, by governments and independent security organizations, such as NATO, the UK National Cyber Security Centre (NCSC), the Common Criteria (EAL +3), the Dutch General Intelligence and Security Service, the Finnish National Cyber Security Centre (TRAFICOM), and ADISA (UK Asset Disposal and Information Security Alliance), among others.

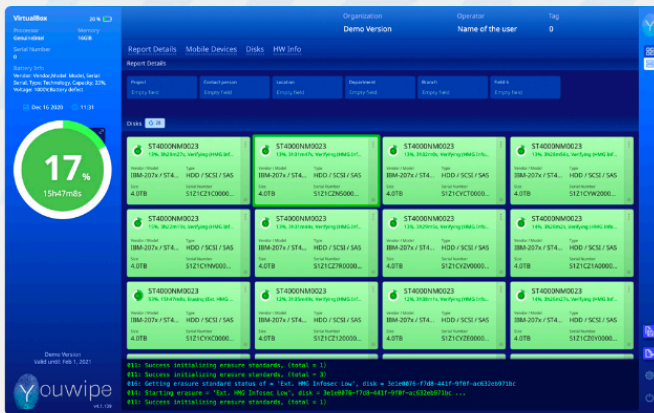

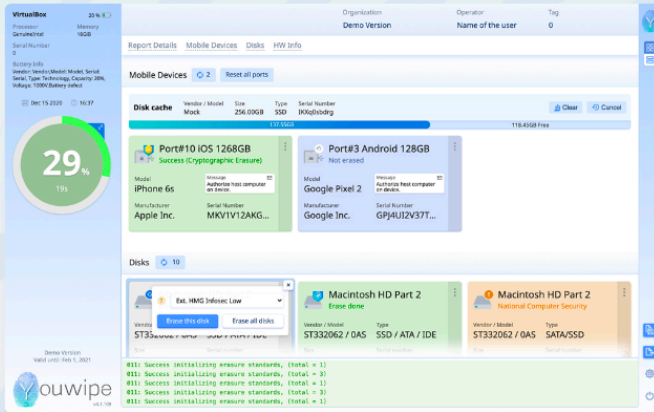

YouWipe meets and exceeds strict government regulations and industry standards, such as the GDPR, HIPAA, FACTA, PCI DSS, SOx and the Data Protection Act.

Once a disk is erased, a digitally signed, tamper-proof certificate of erasure provides a detailed audit trail to comply with external or internal auditing requirements.

Benefits

- ITAD Gold Partner Program
- Attractive Pricing
- 4-year unlimited Enterprise License for public and private organizations
- Special benefits for charity organizations
- Global office presence and technical support
- Supprt and version upgrades without additional costs and no expiry dates
